

It has come to my attention that The National Association of Broadcasters (NAB), the group that represents the large radio and television owners, is using its lobbyists, campaign contributions and political influence to stifle competition and stop XM from offering traffic and weather information and other valuable services to listeners like myself. Anyway, I am a strong support of satellite radio. I listen to XM radio daily, and I use it to obtain the traffic and weather information for my area. Bottom line, I need this service.
